

Date: 6/26/25

This weekly report from the New York State Department of Health presents summaries of select ongoing and emerging infectious disease outbreaks of interest to public health professionals and the public, both globally and in the United States. The Global Health Update summaries include preliminary and up-to-date data that are publicly available for these events at the time of posting. Because this report aggregates and summarizes data and information from outside sources, the quality, accuracy or completeness of that data, and the appropriateness of the methodology used, cannot be guaranteed. Please refer directly to those sources for any data questions. Because the report includes preliminary information, subsequent reports may contain updates or revisions to information in prior reports.

Chikungunya

The Americas – CDC Issues Travel Notice for Bolivia:

According to data from the [Pan American Health Organization \(PAHO\)](#) extracted on June 26, there have been a total of 183,239 chikungunya cases, of which 76,098 are confirmed, and 85 deaths reported in the Americas during 2025.

Chikungunya Cases and Deaths, Americas, 2025			
Cases	Confirmed Cases	Deaths	
Total	Total	Total	CFR*
183,239	76,098	85	0.1%

*Table Notes: Data extracted on June 26, 2025; *CFR calculated among confirmed cases.*

Cases have been reported by 11 countries, primarily Brazil (176,391), Bolivia (3,863), and Argentina (2,817). Those countries also have the highest cumulative incidence rates, at 82.89, 30.71, and 6.14 per 100,000 residents, respectively. On June 26, 2025, the CDC issued a [Level 2 – Practice Enhanced Precautions](#) travel notice posted regarding chikungunya in Bolivia, specifically in Santa Cruz. There were 431,409 cases, of which 232,578 were confirmed, and 245 deaths (CFR: 0.1%) reported in the Americas during 2024.

Réunion – 54,242 Confirmed Cases Reported, Trends Still Declining:

According to data from [Public Health France \(SPF\)](#), as of June 22, there have been a total of 54,242 confirmed locally acquired cases and 27 deaths reported in Réunion during 2025. From June 9 – June 15, 2025, 197 new confirmed cases were reported (a 41% decrease compared to the prior week). Since the previous update, 4 new deaths were reported.

Chikungunya Cases, Hospitalizations, and Deaths, Réunion, 2025						
Confirmed Cases		Hospitalizations^		Deaths		
Total	New*	Total	New	Total	New	CFR**
54,242	197	577	5	27	4	0.05%

Table Notes: Data as of June 22, 2025; *With symptom onset dated June 9 – June 15, 2025; ^For a duration of ≥24 hours; **CFR calculated among confirmed cases.

Weekly new confirmed cases have been declining since the end of March. Weekly new emergency room visits for chikungunya have also been declining since April. Deaths have primarily occurred among individuals aged 65+ years with comorbidities. There are currently 26 deaths under investigation regarding their link to chikungunya, including 2 children aged <6 months.

Additional Information:

- The CDC currently has a [Level 2 – Practice Enhanced Precautions](#) travel notice posted regarding chikungunya in the Region of the Indian Ocean, which includes Réunion.

Listeria

United States – New Outbreak Linked to Fettuccine Alfredo Meals Reported:

According to data from the [CDC](#), as of June 18, there have been a total of 17 cases infected with the outbreak strain of *Listeria monocytogenes* linked to chicken fettuccine alfredo meals distributed by FreshRealm.

Listeria Outbreak Cases, Hospitalizations, and Deaths, United States, 2025						
Cases		Hospitalizations		Deaths		
Total	New	Total	New	Total	New	CFR
17	17	16	16	3	3	17.6%

Table Notes: Data as of June 18, 2025.

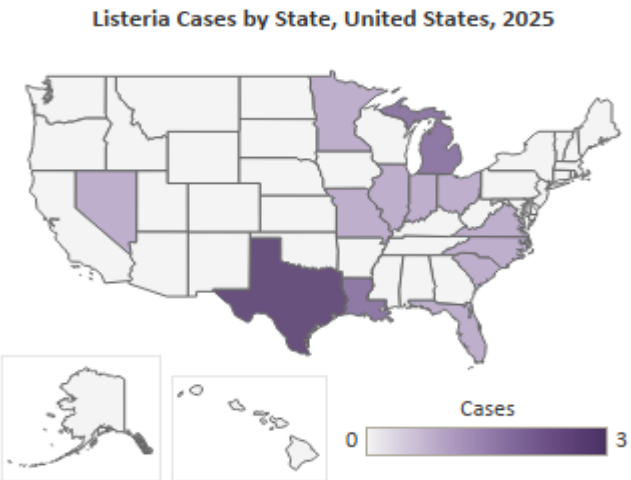

Figure Notes: Data as of June 18, 2025; *Week of sample collection.

Cases have been reported by 13 states, with Texas reporting the highest number of cases (3). Deaths have been reported in Illinois (1), Michigan (1), and Texas (1). Cases reported dates of illness onset ranging from July 24, 2024 – May 10, 2025. Cases range from 4-92 years of age with a median age of 79 years. Among interviewed cases (11), 64% reported eating precooked meals. Among interviewed cases that reported eating precooked meals (7), 57% reported eating chicken fettuccine alfredo specifically. FreshRealm issued a recall on June 17, 2025.

Additional Information:

- For a full list of recalled products, see [USDA Recall Notice](#).

Measles

Canada – Cases Reported in 9 Jurisdictions, Most in Ontario:

According to data from the [Public Health Agency of Canada \(PHAC\)](#), as of June 14, 2025, there have been a total of 3,381 measles cases and 1 death reported in Canada during 2025. Since the previous update, 413 new cases were reported.

Measles Cases, Hospitalizations, and Deaths, Canada, 2025								
Probable Cases		Confirmed Cases		Hospitalizations		Deaths		
Total	New*	Total	New*	Total	New	Total	New	CFR**
300	18	3,081	203	253	26	1	0	0.03%

Table Notes: Data as of June 14, 2025; *From June 8-14, 2025. **CFR calculated among confirmed cases.

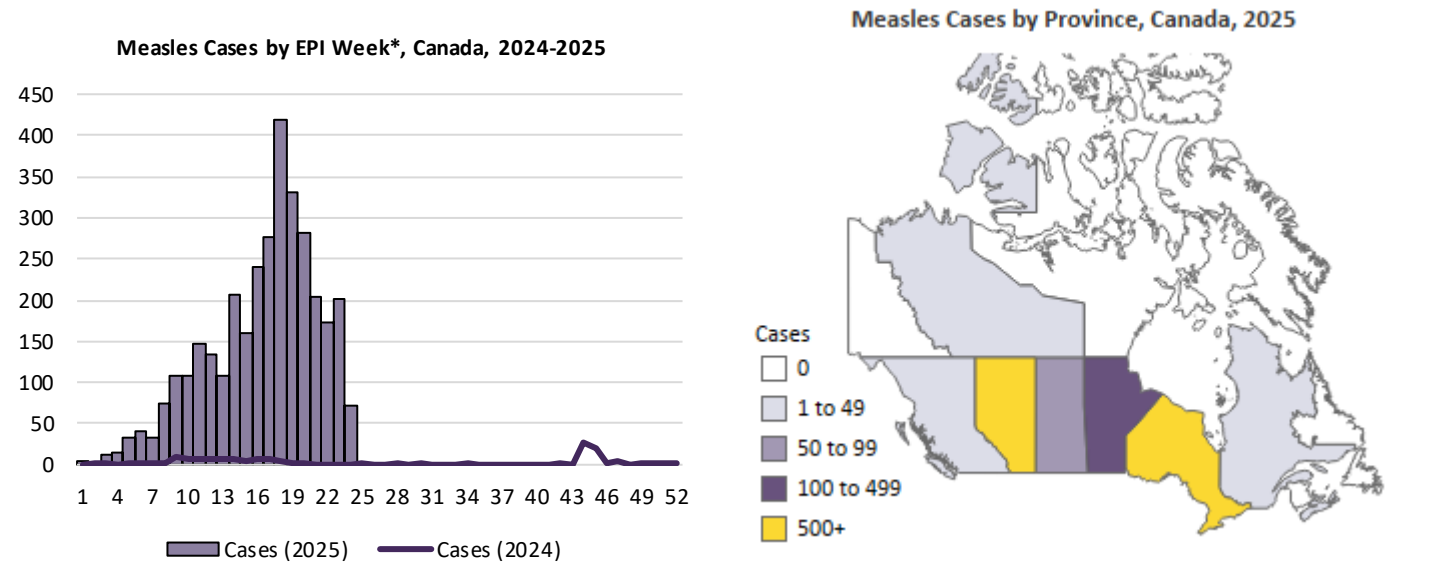

Figure Notes: Data as of June 14, 2025, and includes confirmed and probable cases; *EPI Week of rash onset.

Cases have been reported by 9 provinces and territories, primarily Ontario (2,186) and Alberta (961). There is an ongoing multijurisdictional outbreak that began in October 2024 with 2,360 cases reported – of the cases reported in Canada during 2025, 2,273 are linked to the outbreak. Those aged 5-17 years have been most affected (46%), followed by those aged 18-54 years (27%), and those aged 1-4 years (19%). Among all cases, 92% have been unvaccinated or had unknown vaccination statuses and 7% have been hospitalized. There were a total of 147 confirmed measles cases and 1 death reported in Canada during 2024.

Additional Information:

- More up to date information on cases reported in Ontario is available from [Public Health Ontario](#).

- More up to date information on cases reported in Alberta is available from the [Government of Alberta](#).

Source: [PHAC \(06/23/25\)](#)

Mexico – Cases Reported in 18 Jurisdictions, Most in Chihuahua:

According to data from the [Secretary of Health of Mexico](#), as of June 23, there have been a total of 2,597 confirmed measles cases and 9 deaths reported in Mexico during 2025. Since the previous update, 416 new confirmed cases and 4 new deaths were reported.

Measles Cases and Deaths, Mexico, 2025						
Probable Cases		Confirmed Cases		Deaths		
Total	New	Total	New	Total	New	CFR*
6,522	1,837	2,597	416	9	4	0.3%

Table Notes: Data as of June 23, 2025; *CFR calculated among confirmed cases.

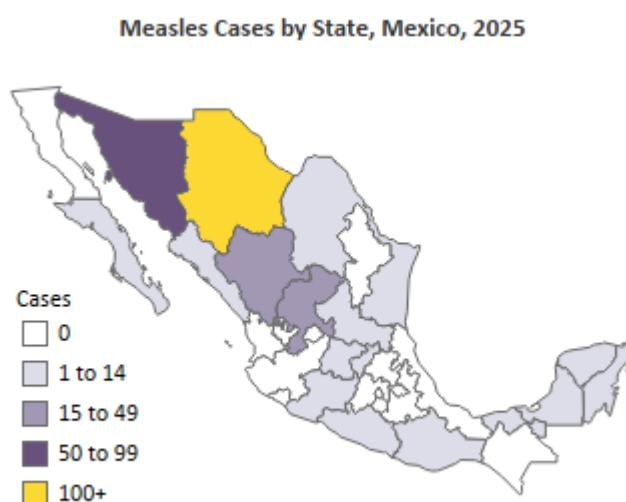

Figure Notes: Data as of June 23, 2025, and includes confirmed cases only; *EPI Week of rash onset.

Confirmed cases have been reported by 18 states, primarily Chihuahua (2,417) and Sonora (78). Those aged 0-4 years have been most affected (520), followed by those aged 25-29 years (386), and those aged 30-34 years (320).

Additional Information:

- The Government of Mexico posts additional weekly updates with further detail on [Vaccine Preventable Diseases](#).

Source: [Government of Mexico \(06/23/25\)](#)

United States – Cases Reported in 37 Jurisdictions, Most in Texas:

According to data from [CDC](#), as of June 24, there have been a total of 1,227 confirmed measles cases and 3 deaths reported in the United States during 2025. Since the previous update, 59 new confirmed cases were reported.

Measles Cases, Hospitalizations, and Deaths, United States, 2025						
Confirmed Cases		Hospitalizations		Deaths		
Total	New	Total	New	Total	New	CFR
1,227	59	148	11	3	0	0.2%

Table Notes: Data as of June 24, 2025; *CFR calculated among confirmed cases.

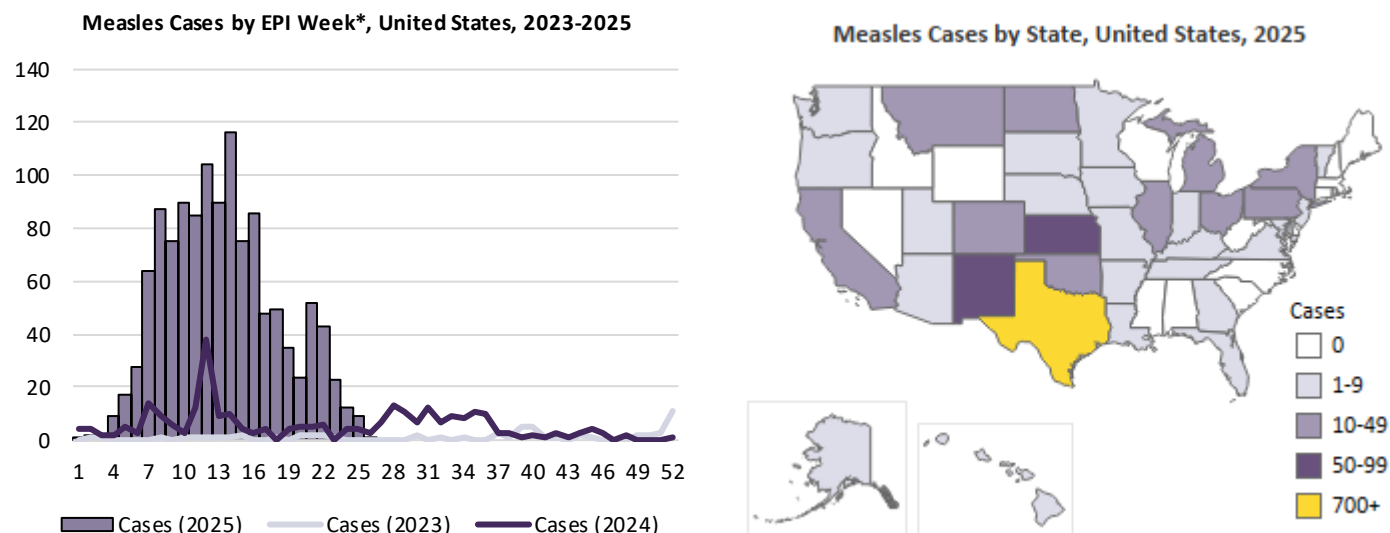

Figure Notes: Data as of June 24, 2025; *EPI Week of rash onset.

Cases have been reported by 37 jurisdictions, primarily Texas, New Mexico and Kansas. There have been 23 outbreaks reported – 89% of cases are outbreak-associated. Those aged 5-19 years have been most affected (37%), followed by those aged 20+ years (33%), and those aged under 5 years (29%). Among all cases, 95% have been unvaccinated or had unknown vaccination statuses and 12% have been hospitalized – including 20% of cases aged under 5 years. There were a total of 285 confirmed measles cases and no deaths reported in the United States during 2024.

Additional Information:

- There have been 6 confirmed cases in [New York City \(NYC\)](#) and 7 in [New York State \(NYS\) outside of NYC](#).
- The NYS Department of Health has issued a [Measles Travel Advisory](#) for all New Yorkers.
- The CDC currently has a [Level 1 – Practice Usual Precautions](#) travel notice posted regarding measles.
- Real-time updates on cases and exposures are available via the [CORI Measles Outbreak Response Dashboard](#).
- The Yale School of Public Health produces highly detailed reports on [Measles Outbreaks in North America](#).

Mpox

Africa – Updated Data on Public Health Emergency of International Concern:

According to data from the [World Health Organization \(WHO\)](#), as of June 22, there have been a total of 43,351 confirmed mpox cases and 142 deaths reported in Africa since the beginning of 2024. Since the previous update, 4,353 new confirmed cases and 9 new deaths were reported.

Mpox Cases and Deaths by Select Countries, Africa, 2024-2025						
Geography	Clades Detected	Confirmed Cases		Deaths		
		Total	New	Total	New	CFR*
Burundi	Ib	4,025	52	1	0	0.0%
DRC	Ia and Ib	26,431	3,252	49	0	0.2%
Sierra Leone	IIa and IIb	4,294	479	28	8	0.7%
Uganda	Ib	6,988	410	44	0	0.6%
Rest of Africa	Ia, Ib, IIa, and IIb	1,613	160	20	1	1.2%
Total	Ia, Ib, IIa, and IIb	43,351	4,353	142	9	0.3%

Table Notes: Data as of June 22, 2025. *CFR calculated among confirmed cases.

Figure Notes: Data as of June 22, 2025, and includes confirmed cases only; *Week of notification – 3,360 cases from the DRC absent from figure.

Confirmed cases have been reported by 26 African countries (21 during 2025), primarily the Democratic Republic of Congo, Uganda, and Burundi, with activity increasing recently in [Sierra Leone](#).

Additional Information:

- The WHO recently [reaffirmed](#) that the situation constitutes a Public Health Emergency of International Concern, a designation first [declared on August 14, 2024](#).

Source: [WHO \(06/26/25\)](#)

Global (Outside of Africa) – New Imported Clade I Cases Reported:

According to data from the [World Health Organization \(WHO\)](#), as of June 26, there have been a total of 60 travel associated (imported) and 18 secondary clade I mpox cases reported outside of Africa during 2025. Since the previous update, 3 new travel associated cases, and 1 new secondary case were reported.

Travel Associated Clade I Mpox Cases, Global (Outside of Africa), 2025					
Cases (Clade Ia)		Cases (Clade Ib)		Secondary Cases (Clade Ia or Ib)	
Total	New	Total	New	Total	New
3	0	57	3	18	1

Table Notes: Data as of June 26, 2025.

In the United States, a new travel associated clade Ib case was reported on June 17, 2025, among an individual from [Massachusetts](#) that recently traveled to East Africa. In China, a new travel associated clade Ib case was reported on June 17, 2025, among an individual that recently traveled to Mali and the Republic of Congo. In the United Kingdom (UK), a new travel associated clade Ib case was reported on June 19, 2025, among an individual that recently traveled to the United Arab Emirates. Additionally, the UK case transmitted the infection to another individual.

Additional Information:

- There have been 5 confirmed cases of clade I mpox reported in the [United States](#), including [New York State](#).

Source: [WHO \(06/26/25\)](#)

Non-Seasonal Influenza

Cambodia – New H5N1 Cases Reported:

According to data from multiple sources, as of June 23, there have been a total of 7 H5N1 cases reported in Cambodia during 2025. Since the previous update, 3 new H5N1 cases and 1 new death were reported.

Human Avian Influenza A(H5N1) Cases and Deaths, Cambodia, Past 6 Months				
Confirmed Cases		Deaths		
Total	New	Total	New	CFR
7	3	5	1	71.4%

Table Notes: Data as of June 23, 2025.

The first new case, a 65-year-old woman from Takeo Province, was not exposed to sick or dying poultry prior to illness onset and is currently receiving medical care according to the latest reports. The second new case, a 52-year-old man from Svay Reing Province, was exposed to sick and dead poultry prior to illness onset and died from infection. The third new case, a 41-year-old woman from Siem Reap Province, was exposed to sick and dead poultry prior to illness onset and is currently in critical condition and receiving medical care according to the latest reports. According to a recent [WHO Report](#), Cambodia reported 16 cases of H5N1 and 6 deaths (CFR: 37.5%) from 2023-2024 after not reporting any cases from 2015-2019.

Sources: [AFD \(06/14/25\)](#), [AFD \(06/21/25\)](#), [AFD \(06/24/25\)](#), [CIDRAP \(06/24/25\)](#), [BEACON \(06/24/25\)](#)

China – New H9N2 and H10N3 Cases Reported:

According to data from the [Hong Kong Centre for Health Protection \(HKCHP\)](#), as of June 21, there have been a total of 19 H9N2 cases and 3 H10N3 cases reported in China in the past 6 months. Since the previous update, 3 new H9N2 cases and 1 new H10N3 case were reported.

Human Avian Influenza A Cases and Deaths by Subtype, China, Past 6 Months					
Subtype	Confirmed Cases		Deaths		
	Total	New	Total	New	CFR
H9N2	19	3	0	0	0.0%
H10N3	3	1	0	0	0.0%

Table Notes: Data as of June 21, 2025.

Among all H9N2 and H10N3 cases reported in the past 6 months, none have been fatal. According to a recent [WHO Report](#), all 3 new H9N2 cases were exposed to poultry prior to illness onset and the H10N3 case remains hospitalized and in treatment. A total of 130 H9N2 cases have been reported in China since late 2015. A total of 6 cases of H10N3 have been reported globally.

Source: [HKCHP \(06/24/25\)](#), [WHO \(06/23/25\)](#)

Oropouche

The Americas – Updated Data on 2025 Trends:

According to data from the [Pan American Health Organization \(PAHO\)](#) extracted on June 26, there have been a total of 12,131 confirmed oropouche cases and 5 deaths reported in the Americas during 2025. Since the previous update, 260 new confirmed cases were reported.

Oropouche Cases and Deaths, Americas, 2025						
Suspected Cases		Confirmed Cases		Deaths		
Total	New	Total	New	Total	New	CFR*
14,564	260	12,131	260	5	0	0.04%

Table Notes: Data extracted on June 26, 2025; *CFR calculated among confirmed cases.

Figure Notes: Data extracted on June 26, 2025, and includes confirmed cases only.

Confirmed cases have been reported by 8 countries in the Americas, primarily Brazil (11,565), Panama (287), and Peru (233). There were a total of 16,189 confirmed oropouche cases and 4 deaths (CFR: 0.02%) reported in the Americas during 2024.

Additional Information:

- The CDC currently has a [Level 1 – Practice Usual Precautions](#) travel notice posted regarding oropouche in the Americas, and [Level 2 – Practice Enhanced Precautions](#) travel notice posted regarding oropouche in parts of Brazil and Panama.
- According to [CDC data](#), as of June 17, a total of 109 cases have been reported in the United States during 2024-2025, all of which have been travel associated.

Source: [PAHO \(06/26/25\)](#)

Pertussis

United States – Updated Data on 2025 Trends:

According to provisional data from the [CDC](#), as of June 21, there have been a total of 14,228 pertussis cases and at least [5 deaths](#) reported among US residents during 2025. Since the previous update, 1,090 new cases were reported, of which 170 had symptom onset during the most recent reporting week (a 14% decrease compared to the prior week).

Pertussis Cases by Region with Prior Year Comparison, United States, 2024-2025				
Reporting Area	Cases			
	Current Week	Cumulative (2025)	Cumulative (2024)	Ratio (2025/2024)
New England	0	232	321	0.7
Middle Atlantic	18	969	2,741	0.4
East North Central	7	2,447	1,579	1.5

West North Central	0	1,305	555	2.4
South Atlantic	56	1,783	1,033	1.7
East South Central	11	1,285	255	5.0
West South Central	21	865	363	2.4
Mountain	20	1,733	1,018	1.7
Pacific	37	3,609	1,983	1.8
Total	170	14,228	9,848	1.4

Table Notes: Data as of June 21, 2025; Case counts are provisional and subject to change; New York State is included in the Middle Atlantic region.

Case totals for 2025 are currently 1.4-fold higher compared to 2024 as of the same date. There were a total of 35,435 pertussis cases and 10 deaths reported in the US during [2024](#), representing a return to pre-pandemic [trends](#).

Additional Information:

- The Pan American Health Organization (PAHO) recently released an [Epidemiological Alert](#) regarding pertussis in the Americas.

Source: [CDC \(06/25/25\)](#)

Polio

Global – New WPV1 and cVDPV2 Cases Reported in Multiple Countries:

According to data from the [Global Polio Eradication Initiative \(GPEI\)](#), as of June 23, there have been a total of 14 confirmed wild poliovirus type 1 (WPV1) cases, 75 circulating vaccine-derived poliovirus type 2 (cVDPV2) cases, and 2 circulating vaccine-derived poliovirus type 3 (cVDPV3) cases with onset of paralysis reported during 2025. Since the previous update, 1 new WPV1 case was reported in Pakistan, and 7 new cVDPV2 cases were reported in Benin (2), Ethiopia (4), and Yemen (1).

Polio Cases, Global, 2025							
WPV1		cVDPV1		cVDPV2		cVDPV3	
Total	New	Total	New	Total	New	Total	New
14	1	0	0	75	7	2	0

Table Notes: Data as of June 23, 2025, and only includes cases with onset of paralysis during 2025.

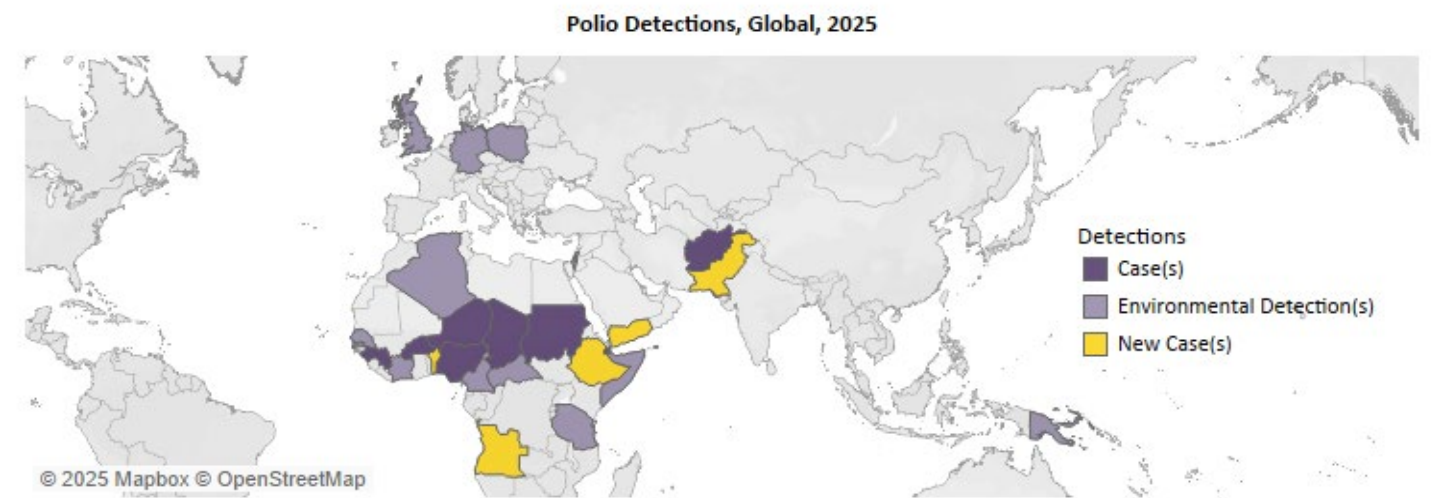

Figure Notes: Data as of June 23, 2025, and only includes cases with onset of paralysis or environmental detection samples collected during 2025.

Polio cases with onset of paralysis during 2025 have been reported by 13 countries. Environmental detections from samples collected during 2025 have been reported by 13 countries with no reported cases, suggesting undetected transmission. A total of 19 WPV1 cases, 11 cVDPV1 cases, 305 cVDPV2 cases, and 4 cVDPV3 cases have been reported with onset of paralysis during 2024.

Additional Information:

- The CDC currently has a [Level 2 – Practice Enhanced Precautions](#) travel notice posted regarding polio.
- The NYS Department of Health recently issued a [Health Advisory](#) providing guidance regarding reporting and submission of specimens for persons with suspected acute flaccid myelitis (AFM).

Source: [GPEI-1 \(06/23/25\)](#), [GPEI-2 \(06/23/25\)](#)

Salmonella

United States – New Outbreak Linked to Pistachio Cream Reported:

According to data from the [CDC](#), as of June 13, there have been a total of 4 cases infected with the outbreak strain of *Salmonella* Oranienburg linked to pistachio cream manufactured by Emek.

Salmonella Outbreak Cases, Hospitalizations, and Deaths, United States, 2025						
Cases		Hospitalizations		Deaths		
Total	New	Total	New	Total	New	CFR
4	4	1	1	0	0	0.0%

Table Notes: Data as of June 13, 2025.

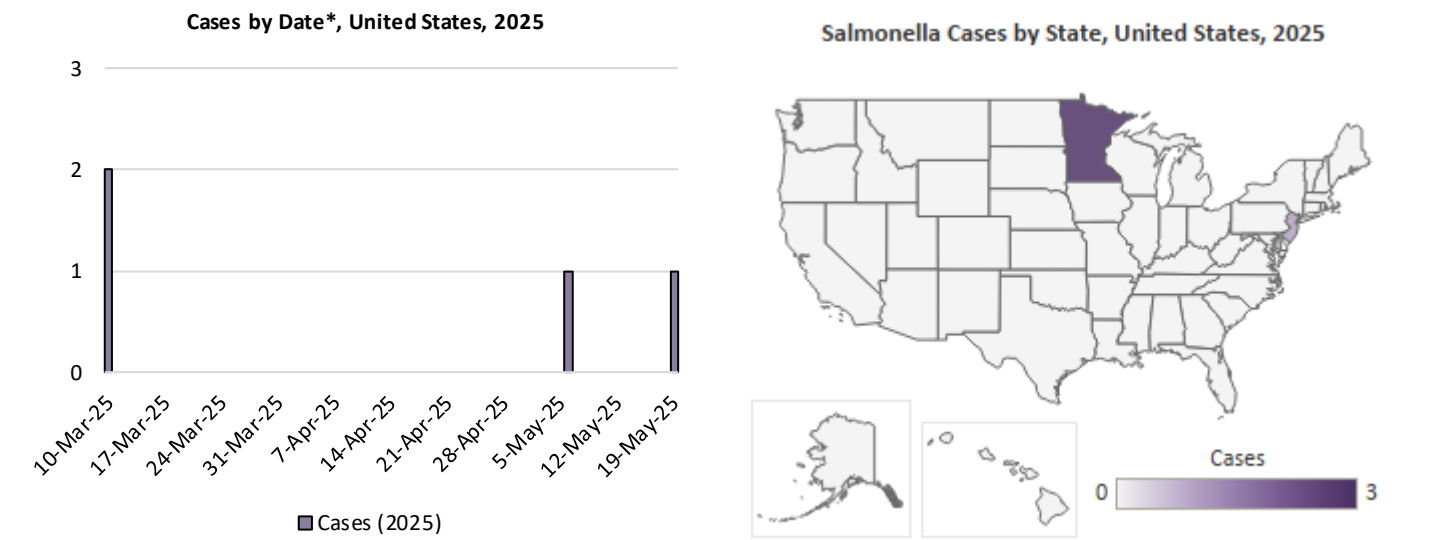

Figure Notes: Data as of June 5, 2025; *Date of illness onset.

Cases have been reported in Minnesota (3) and New Jersey (1). Cases reported dates of illness onset ranging from March 10 – May 19, 2025. Cases range from 16-54 years of age with a median age of 24 years. Among interviewed cases (4), 100% reported eating pistachio cream, of which 3 reported eating at the same restaurant. Whole genome sequencing showed that *Salmonella* in the pistachio cream was closely related to samples collected from cases.

Additional Information:

- For a full list of affected products, see [FDA Outbreak Investigation](#).

Source: [CDC \(06/13/25\)](#)

United States – Update on Outbreak Linked to Backyard Poultry:

According to data from the [CDC](#), as of June 23, there have been a total of 187 cases of *Salmonella* Enteritidis, Indiana, London, and Mbandaka infections linked to backyard poultry. Since the previous update, 83 new cases were reported.

Salmonella Outbreak Cases, Hospitalizations, and Deaths, United States, 2025						
Cases		Hospitalizations*		Deaths		
Total	New	Total	New	Total	New	CFR
187	83	42	17	1	0	0.5%

Table Notes: Data as of June 23, 2025; *Among 138 cases with available information.

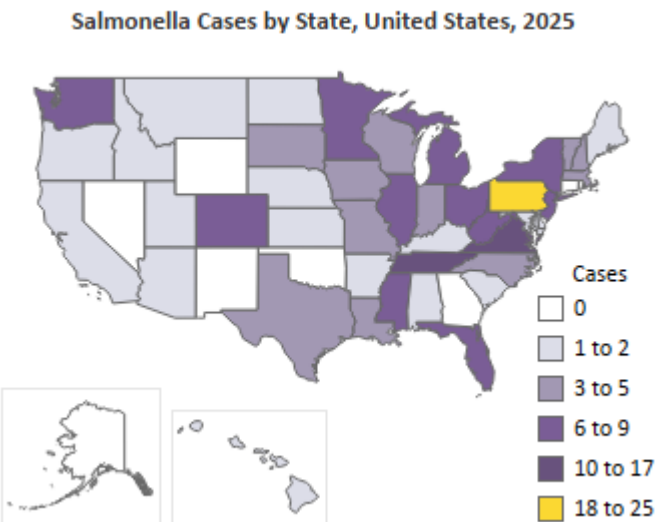

Figure Notes: Data as of June 23, 2025; *Date of illness onset.

Cases have been reported in 42 states, primarily Pennsylvania (25), Tennessee (11), and Virginia (10). Cases reported dates of illness onset ranging from February 9 – May 31, 2025. Cases range from <1-86 years of age with a median age of 36 years. Among cases with information regarding animal contact (131), 82% reported contact with backyard poultry prior to illness onset. Among cases who reported owning backyard poultry (54), 79% reported purchasing or obtaining poultry during 2025 from agricultural retail stores. Current outbreak strains have been linked to 2 hatcheries.

Additional Information:

- CDC has published guidance on [how to stay healthy around backyard poultry](#).

Source: [CDC \(06/26/25\)](#)

Yellow Fever

The Americas – Updated Data on 2025 Trends:

According to data from the [Pan American Health Organization \(PAHO\)](#), as of June 24, there have been a total of 249 confirmed yellow fever cases and 98 deaths reported in the Americas during 2025. Since the previous update, 15 new confirmed cases and 3 new deaths were reported.

Yellow Fever Cases and Deaths, Americas, 2025				
Confirmed Cases		Deaths		
Total	New	Total	New	CFR*
249	15	98	3	39.4%

Table Notes: Data as of June 24, 2025; *CFR calculated among confirmed cases.

Figure Notes: Data as of June 24, 2025, and includes confirmed cases only; *EPI Week of symptom onset; ^56 cases not shown in figure for 2025 as they were reported only on an annual basis.

Cases have been reported by 5 countries in South America: Bolivia (4), Brazil (111), Colombia (88), Ecuador (8), and Peru (38). There were a total of 61 confirmed yellow fever cases and 30 deaths (CFR: 49.2%) reported in the Americas during 2024.

Additional Information:

- The CDC currently has a [Level 2 – Practice Enhanced Precautions](#) travel notice posted regarding yellow fever in South America.
- The PAHO recently released an updated [Rapid Risk Assessment](#), assessing the overall regional risk as High.
- The PAHO recently released an [Epidemiological Alert](#) regarding yellow fever in the Americas.
